**Hitten College | Amman, Jordan**

Diploma in Graphic Design [July - 2021]

- Gained expertise in branding, typography, layout design, and Adobe Creative Suite.

## WORK EXPERIENCE:

**Link Business Solutions – Jordan:**

- Design end-to-end digital experiences across **ERP systems, web platforms, mobile applications, dashboards, POS systems, and business management solutions**.
- Design user interfaces and experiences for complex business systems, translating business requirements and workflows into intuitive, scalable, and user-friendly digital products.
- Work closely with developers and business teams to understand system logic, business processes, user roles, permissions, and workflows, ensuring that designs are practical and technically implementable.
- Design and contribute to multiple **ERP modules and integrated business systems**, with a strong focus on usability, consistency, and efficient workflows.
- Design responsive **websites and web applications**, including the official **Link Business Solutions website** from concept through final UI implementation.

- Design modern and user-friendly **mobile applications** for different types of users and business needs.
- Create **administrative dashboards** with role-based access, permissions, data management, reporting, and operational workflows.
- Contribute to the design of an integrated **HR Management System**, working closely with the development team to improve usability, workflows, and the overall user experience.
- Design systems involving **AI-powered invoice reading and data processing**, focusing on clear workflows and efficient user interaction.

**Selected Client Project - Planet Donuts**

- Designed and contributed to a comprehensive digital ecosystem including **ERP systems, Warehouse Management, Factory Management, POS, mobile application, website, administrative dashboards, AI-powered invoice processing, and other digital solutions**.
- Developed user experiences based on real business operations, including inventory, production, sales, branch operations, and system integrations.
- Worked on connecting and maintaining consistent experiences across multiple business systems and user roles.
